

SARDAUNA TECH LAB LTD

Company Profile

Company Overview

Sardauna Tech Lab Ltd is a Nigerian technology company focused on designing, developing and delivering digital products, custom software systems and technology solutions for businesses, institutions, startups and organizations.

The company combines software engineering, product development, UI/UX design, project management, technology consulting and digital transformation services to help clients solve operational challenges, improve efficiency and build scalable digital products.

Sardauna Tech Lab approaches technology from a practical perspective. Rather than building software for its own sake, the company focuses on developing solutions that solve real business problems, improve processes, support growth and create measurable value.

The company operates from Dutse, Jigawa State, Nigeria, while serving clients and organizations across different sectors.

Who We Are

Sardauna Tech Lab is a technology and product engineering company committed to helping organizations use technology to improve operations, deliver better services and create new opportunities.

We work across the complete technology development lifecycle, from understanding business requirements and designing user experiences to software engineering, deployment, maintenance and continuous improvement.

Our work cuts across:

- software development
- web engineering
- mobile applications
- custom enterprise systems
- digital product development
- business process automation
- UI/UX design
- IT consulting
- project management
- backend and cloud systems

We work with startups, SMEs, businesses, institutions, government-related organizations and other clients seeking reliable technology solutions.

Our Vision

To become a trusted technology company recognized for building practical, reliable and scalable digital solutions that improve businesses, institutions and communities.

Our Mission

To design and deliver technology products and systems that solve real problems, improve organizational efficiency and enable businesses and institutions to grow through technology.

We achieve this by combining strong engineering practices, thoughtful product design, structured project delivery and a deep understanding of our clients' needs.

Our Purpose

Our purpose is simple:

To use technology to help organizations work better, grow stronger and solve meaningful problems.

We believe technology should not be complicated for the people using it.

Good technology should make work easier, processes faster, information clearer and services more accessible.

What We Do

1. Web Development & Engineering

We design and develop professional websites, web platforms and web-based applications for businesses and organizations.

Our web development services include:

- corporate websites
- business platforms
- customer portals
- administrative dashboards
- web applications
- e-commerce platforms
- service platforms
- responsive interfaces
- API-integrated applications

Our focus is on performance, usability, scalability, security and maintainability.

2. Mobile Application Development

We design and develop mobile applications that provide reliable and intuitive experiences across mobile devices.

Our capabilities include:

- business mobile applications
- service platforms
- customer applications
- internal operational applications
- mobile-first platforms
- API-connected applications

We focus on developing applications that are simple to use, responsive and designed around actual user needs.

3. Custom Software Systems

Every organization operates differently.

Where off-the-shelf software cannot adequately address a business process, we design custom systems around the client's workflow.

Our custom software solutions include:

- enterprise management systems
- inventory systems
- POS systems
- reporting platforms
- monitoring systems
- staff management systems
- business workflow systems
- customer management systems
- operational dashboards

- specialized institutional platforms

We design these systems around the organization's actual processes instead of forcing organizations to adapt to unsuitable software.

4. UI/UX Design

We design digital experiences that are functional, intuitive and easy to use.

Our UI/UX services include:

- product research
- user journey design
- information architecture
- wireframing
- interface design
- interactive prototypes
- design systems
- responsive design
- usability improvement

Our design process balances business goals, technical requirements and user experience.

5. Artificial Intelligence & Automation

We help organizations improve productivity by introducing practical automation into existing processes.

Our work may include:

- workflow automation
- business process automation
- repetitive task automation
- intelligent internal tools
- data processing workflows

- productivity systems
- system integrations

Our approach is based on practical value. We only introduce automation where it clearly improves efficiency, accuracy or service delivery.

6. Project Management

Technology projects require more than good code.

Sardauna Tech Lab provides structured technology project management to help organizations move projects from concept to successful implementation.

Our project management capabilities include:

- requirements gathering
- project planning
- scope management
- project documentation
- milestone planning
- team coordination
- stakeholder communication
- risk management
- implementation monitoring
- quality assurance
- delivery management

We help ensure that technology projects remain aligned with their objectives, timelines and operational requirements.

7. IT Consultancy

We provide professional technology advisory services to organizations planning new systems, improving existing infrastructure or undergoing digital transformation.

Our consulting services include:

- technology strategy
- system planning
- software architecture
- digital transformation planning
- technical requirements analysis
- technology stack selection
- system evaluation
- operational technology improvement
- implementation planning
- technology project advisory

Our objective is to help organizations make better technology decisions before investing significant resources.

8. Backend, Database & Cloud Solutions

Reliable digital platforms require strong backend infrastructure.

Our backend engineering capabilities include:

- REST API development
- database design
- authentication systems
- backend architecture
- server configuration
- data management
- cloud integration
- application deployment
- security configuration

- system integrations

We work with modern technologies and infrastructure based on the requirements of each project.

Our Solutions & Products

Sardauna Tech Lab also develops technology products that address common business and industry challenges.

EventPass

EventPass is an event management and ticketing platform designed to simplify event creation, registration, ticketing and attendee management.

Core capabilities include:

- event creation
- event registration
- digital ticketing
- QR-based check-in
- organizer dashboards
- attendee management
- event analytics

EventPass is being developed as a platform capable of supporting event organizers and attendees across broader African markets.

TraderERP

TraderERP is a business management and ERP platform designed primarily for SMEs and retail businesses.

The platform helps businesses manage operations through features such as:

- point of sale
- sales management

- inventory management
- stock monitoring
- expense management
- customer management
- supplier management
- credit and debt tracking
- business reports
- multi-branch operations

TraderERP is designed around the everyday operational realities of small and growing businesses.

Custom Business Platforms

Beyond our internally developed products, we design and build specialized systems for clients across different sectors.

Examples include:

- restaurant management platforms
 - inventory management solutions
 - ordering platforms
 - business dashboards
 - institutional management systems
 - monitoring systems
 - customer service platforms
 - operational workflow systems
-

Industries We Serve

Sardauna Tech Lab works across multiple industries and sectors.

Small and Medium Enterprises

Helping SMEs digitize operations, manage customers, improve sales processes and automate daily business activities.

Retail

Developing inventory, POS, sales and business management platforms.

Hospitality

Building systems for restaurants, hospitality businesses and service providers.

Events

Developing event management, ticketing and registration platforms.

Education

Supporting educational institutions, training organizations and education-focused projects with digital systems.

Government & Public Institutions

Designing structured technology platforms capable of supporting administrative processes, monitoring, reporting and digital service delivery.

Non-Governmental Organizations

Supporting organizations that require project management, data collection, reporting and program management solutions.

Startups

Helping founders move from idea to validated digital product through product design, software development and technical strategy.

Professional Services

Developing websites, platforms and systems for service-based organizations.

Our Approach

We follow a structured process for every major project.

1. Discover

We begin by understanding the organization, users, business problem and desired outcome.

Activities may include:

- stakeholder discussions
 - process review
 - requirement gathering
 - user analysis
 - existing system assessment
-

2. Define

We translate the problem into a clear technology solution.

This includes:

- project scope
 - feature requirements
 - system architecture
 - technology selection
 - timeline
 - project milestones
-

3. Design

We design the user experience and system structure.

Activities include:

- user flows
 - wireframes
 - UI design
 - design systems
 - prototypes
-

4. Build

Our engineering team develops the platform using technologies appropriate to the project.

Development includes:

- frontend engineering
 - backend engineering
 - database implementation
 - API development
 - integrations
 - authentication
 - security implementation
-

5. Test

Before deployment, systems undergo quality assurance.

Testing includes:

- functional testing
 - usability testing
 - responsive testing
 - browser compatibility
 - security checks
 - performance testing
 - error handling
-

6. Deploy

After approval and testing, the system is prepared for production.

Deployment may include:

- production configuration

- hosting setup
 - domain configuration
 - SSL
 - database deployment
 - email configuration
 - analytics
 - monitoring
-

7. Support & Improve

Technology continues to evolve after launch.

We provide:

- maintenance
 - bug fixes
 - feature improvements
 - performance optimization
 - infrastructure support
 - system updates
-

Our Technology Capabilities

Our technology stack varies according to the requirements of each project.

Technologies we work with include:

Frontend

- Next.js
- React
- TypeScript
- JavaScript

- Tailwind CSS
- HTML
- CSS
- Framer Motion
- Three.js

Backend

- Laravel
- PHP
- Node.js
- Express.js
- REST APIs

Databases & Backend Services

- MySQL
- PostgreSQL
- Firebase
- Firestore
- Supabase

Cloud & Infrastructure

- Vercel
- Render
- Google Cloud
- DirectAdmin
- cloud-based backend services

Product Design

- Figma
- responsive design systems

- prototyping
- UX planning

Our technology selection is based on project requirements rather than forcing every project onto the same stack.

Why Sardauna Tech Lab

Practical Technology

We build systems around real problems and operational needs.

End-to-End Capability

We can support projects from planning and design through development and deployment.

Product Thinking

We focus on the complete product rather than only writing code.

Flexible Development

We choose technologies based on the requirements of the project.

Structured Project Delivery

We apply project management processes to keep implementation organized.

Long-Term Support

We design systems that can be maintained and improved after launch.

Local Understanding, Broader Ambition

Operating from Northern Nigeria gives us a strong understanding of local business and institutional realities while designing technology capable of serving much broader markets.

Our Values

Integrity

We communicate clearly and avoid making commitments we cannot deliver.

Quality

We take engineering, design and project delivery seriously.

Innovation

We continuously explore better ways of solving problems through technology.

Accountability

We take ownership of the work we agree to deliver.

Simplicity

We believe strong technology should simplify operations rather than make them more complicated.

Continuous Improvement

Technology changes rapidly, and we continuously improve our skills, processes and products.

Collaboration

Successful products are built through communication between clients, users, designers, engineers and project teams.

Leadership

Muhammad Auwal Abubakar

Founder & Chief Executive Officer

Muhammad Auwal Abubakar leads Sardauna Tech Lab Ltd with experience across software engineering, technology project management, product development and digital innovation.

His work focuses on designing technology products, managing software projects and developing systems that solve practical business and organizational problems.

Maryam Abubakar

Co-Founder

Maryam Abubakar is part of the founding leadership of Sardauna Tech Lab Ltd and contributes to the company's growth, development and strategic direction.

Our Work Culture

Sardauna Tech Lab aims to build a culture centered on:

- continuous learning
- technical excellence
- collaboration
- responsibility
- creative problem solving
- professional communication
- practical innovation
- customer-focused development

We believe strong technology companies are built through capable people, clear processes and continuous improvement.

Research, Learning & Innovation

Technology changes quickly.

For this reason, Sardauna Tech Lab encourages continuous exploration of:

- emerging software technologies
- modern engineering practices
- cloud computing
- cybersecurity
- artificial intelligence
- product development
- automation
- user experience
- data systems
- scalable software architecture

The goal is not to adopt every new technology, but to understand where new technologies can create genuine value.

Our Commitment to Clients

Every client engagement should be built around clear communication and shared understanding.

We aim to:

- understand the client's actual problem
- define expectations clearly
- recommend realistic technology solutions
- provide structured implementation plans
- communicate project progress
- test before deployment
- protect client information
- provide appropriate post-launch support

Our objective is to build long-term relationships, not simply complete transactions.

Quality Assurance

Before a system is released, our quality assurance process may include:

- feature testing
- responsive testing
- user experience review
- performance testing
- security review
- API testing
- database validation
- browser compatibility testing
- production readiness checks

Quality assurance requirements vary according to the type and complexity of each system.

Security Philosophy

Security is considered throughout the development process.

Depending on the system, our security practices may include:

- secure authentication
- role-based access control
- encrypted communication
- HTTPS
- server-side validation
- database protection
- environment variable protection
- secure password handling
- API authorization
- file upload validation
- audit logging
- rate limiting
- backup planning

Security requirements are evaluated according to each project's risk profile.

Partnership Opportunities

Sardauna Tech Lab is open to strategic collaboration with:

- technology companies
- startups
- software firms
- government institutions

- development organizations
- NGOs
- educational institutions
- consulting firms
- business organizations
- innovation hubs

Possible partnership areas include:

- joint software development
 - technology implementation
 - digital transformation
 - client referrals
 - product development
 - capacity building
 - technology consulting
 - innovation programs
 - research and development
-

Careers & Talent

Sardauna Tech Lab is interested in working with talented people across areas such as:

- software engineering
- frontend development
- backend development
- mobile development
- UI/UX design
- product management
- project management

- cy b e r s e c u r i t y
- c l o u d e n g i n e e r i n g
- b u s i n e s s d e v e l o p m e n t
- t e c h n i c a l s u p p o r t

The company also supports opportunities for interns and emerging technology professionals where appropriate.

Our Long-Term Direction

Sardauna Tech Lab is being developed beyond the traditional software agency model.

Our long-term direction is to grow into a technology organization with capabilities across:

- s o f t w a r e e n g i n e e r i n g
- p r o p r i e t a r y t e c h n o l o g y p r o d u c t s
- e n t e r p r i s e s y s t e m s
- c l o u d t e c h n o l o g i e s
- b u s i n e s s a u t o m a t i o n
- d i g i t a l i n f r a s t r u c t u r e
- t e c h n o l o g y c o n s u l t i n g
- r e s e a r c h a n d i n n o v a t i o n
- p r o j e c t i m p l e m e n t a t i o n
- t e c h n o l o g y e d u c a t i o n a n d t a l e n t d e v e l o p m e n t

We aim to create technology that can serve organizations in Nigeria while expanding into broader African and international markets.

Corporate Positioning Statement

Sardauna Tech Lab Ltd is a technology and software engineering company that designs, builds and delivers digital products, business systems and technology solutions for organizations

seeking to improve operations, scale effectively and solve real-world problems through technology.

Brand Promise

Technology built for real problems.

Alternative Brand Statement

We build technology that works for businesses, institutions and people.

Company Profile Summary

Sardauna Tech Lab Ltd is building a technology company focused on delivering reliable digital products and systems that solve practical problems.

Through software engineering, product design, project management, consulting and technology innovation, the company supports businesses, institutions and organizations seeking to improve the way they operate.

Our work is guided by a simple belief:

Technology should not exist simply because it can be built. It should exist because it creates value, solves a problem and makes something better.
