

SARDAUNA TECH LAB LTD

Master Development Specification

Production Build for 48-Hour Launch

Domain: sardaunatechlabs.com.ng

Hosting: Premium 8GB DirectAdmin Web Hosting

Frontend: Next.js + TypeScript + Tailwind CSS

Backend: Laravel / PHP

Database: MySQL

Animations: Framer Motion + selective GSAP / Three.js

CM S: Custom Internal CM S

Architecture: API-driven corporate website

1. PROJECT GOAL

Build Sardauga Tech Lab Ltd's primary corporate website as a polished, high-performance technology-company platform.

The website must position the company as an organization that:

- designs digital products
- engineers software systems
- builds business platforms
- develops mobile and web applications
- delivers technology consulting
- manages digital projects
- implements automation
- supports organizations through technology

This is not intended to look like a small agency website.

The design benchmark should reflect the discipline and quality seen in leading technology companies while maintaining Sardauga Tech Lab's own identity.

2. CORE EXPERIENCE

Within the first 10 seconds, the visitor should understand:

Sardauna Tech Lab builds technology products, systems and digital infrastructure for modern organizations.

The website should communicate three things strongly:

Capability

We know how to build.

Credibility

We operate professionally.

Confidence

Organizations can trust us with serious projects.

3. PRODUCT PRINCIPLES

Every feature should follow these principles:

1. Clean before decorative
 2. Fast before complex
 3. Real content before marketing claims
 4. Mobile-first responsiveness
 5. Purposeful animation
 6. Strong information hierarchy
 7. Consistent component system
 8. Accessible interaction
 9. SEO-ready architecture
 10. CMS-managed content wherever appropriate
-

4. FINAL TECHNOLOGY STACK

Frontend

- Next.js
- TypeScript
- Tailwind CSS
- Framermotion
- GSAP where advanced sequencing is required
- Three.js only for carefully selected visual experiences
- Lucide or another consistent icon system

Backend

- Laravel
- PHP
- REST API
- Laravel validation
- Laravel Mail
- Laravel storage
- Laravel queues where server support permits

Database

MySQL.

Authentication

Laravel-managed authentication for CMS users.

Preferred implementation:

- secure cookies or Laravel Sanctum
- server-side authorization
- role-based permissions

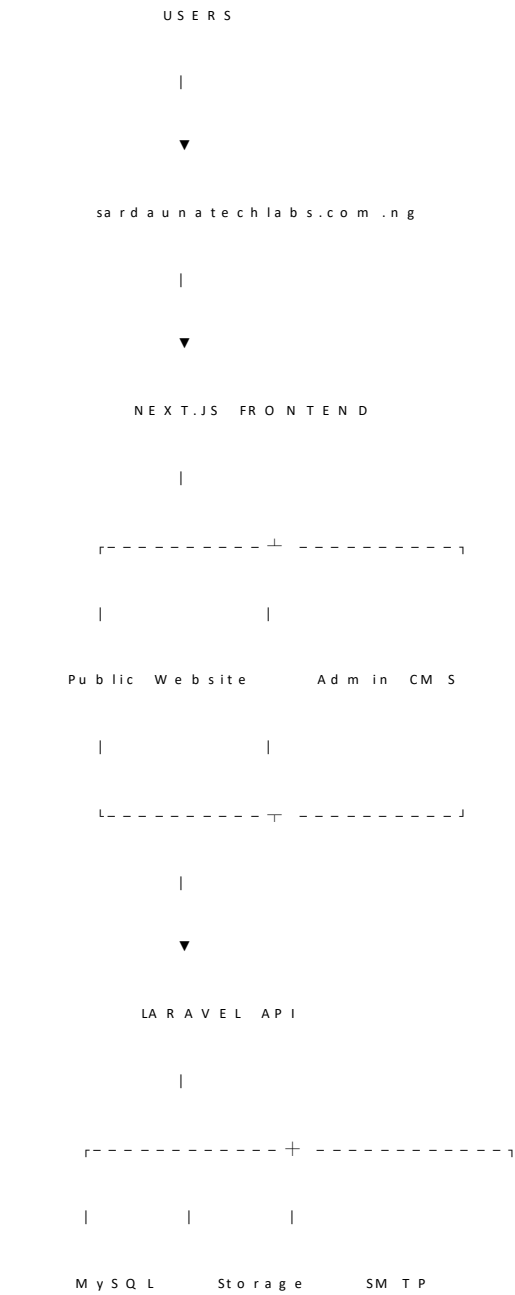

Hosting

Premium 8GB DirectAdmin hosting.

Email

DirectAdmin SMTP using the corporate domain.

5. HIGH-LEVEL ARCHITECTURE

Preferred API endpoint:

api.sardaunatechlabs.com.ng

Alternative:

7. GLOBAL NAVIGATION

Desktop navigation:

Logo

Company

Services

Solutions

Work

Insights

Careers

Contact

Primary CTA:

Start a Project

8. NAVIGATION BEHAVIOUR

Navbar requirements:

- sticky navigation

- transparent over initial hero where appropriate
- solid background after scrolling
- subtle transition
- active page indicator
- responsive mobile navigation
- accessible keyboard navigation
- mobile full-screen or large drawer menu

Services may use a mega menu.

Example :

Services

└ -- Web Engineering

└ -- Mobile Development

└ -- Custom Systems

└ -- UI/UX Design

└ -- AI & Automation

└ -- Project Management

└ -- IT Consultancy

└ -- Cloud & Backend

9. HOMEPAGE SPECIFICATION

The homepage is the most important product surface.

Section 1: Hero

Goal

Immediately establish identity and capability.

Suggested headline

We build technology that moves businesses forward.

Alternative:

Engineering technology for businesses ready to grow.

Supporting statement:

Sardauna Tech Lab designs and builds digital products, business systems and technology solutions for organizations solving real problems.

CTAs

Primary:

Start a Project

Secondary:

Explore Our Work

Visual treatment

Preferred concept:

A refined animated interface or technology ecosystem.

Avoid:

- generic laptop mockups
- random floating 3D shapes
- overly futuristic visual effects
- AI-generated human imagery

10. HERO ANIMATION

Sequence:

1. Navbar fade-in
2. Small eyebrow text appears
3. Headline reveals line-by-line
4. Supporting content fades upward

5. C T A s a p p e a r

6. M a i n v i s u a l l o a d s

7. B a c k g r o u n d v i s u a l b e g i n s s u b t l e c o n t i n u o u s m o v e m e n t

Mobile Applications

Mobile-first products and customer experiences.

Custom Systems

Operational platforms, ERP systems and specialized business software.

UI/UX Design

Research, interface design and product experience.

AI & Automation

Practical automation and workflow improvement.

IT Consultancy

Technology planning, system advisory and transformation.

Project Management

Structured project delivery from planning through deployment.

Cloud & Backend

APIs, databases, infrastructure and backend engineering.

13. SERVICE CARD DESIGN

Each card should include:

- title
- concise description
- icon or custom line visual
- arrow
- hover transition

Hover:

- slight card movement
- subtle border change
- arrow movement

- optional background illustration reveal

No excessive glow effects.

14. FEATURED PRODUCTS

Heading:

Products & Platforms

Initial products:

EventPass

Event creation, registration, ticketing, attendee management and check-in.

TraderERP

Business operations, POS, sales, inventory and SME management.

Products should be presented as serious software platforms.

Each should have:

- screenshot
 - category
 - description
 - technology context
 - CTA
 - product status
-

15. FEATURED WORK

Heading:

Selected Work

Display 3 to 6 high-quality case studies.

Each project card:

- project image

- title
- client/category
- short description
- technologies
- view case study

Use actual system screenshots wherever possible.

16. INDUSTRIES

Heading :

Built for different industries.

Initial categories :

- Government
 - Education
 - SMEs
 - Retail
 - Hospitality
 - Events
 - NGOs
 - Professional Services
 - Technology
-

17. ENGINEERING PROCESS

Heading :

From idea to production.

Stages :

01 Discover

Understand the problem , users , organization and requirements .

02 Define

Establish scope , architecture and success criteria .

03 Design

Develop user experience and system design .

04 Build

Engineer the product and backend .

05 Test

Quality assurance , performance and security checks .

06 Deploy

Release into production .

07 Improve

Monitor , support and continuously improve .

Desktop may use horizontal progression .

Mobile must stack vertically .

18 . TECHNOLOGY SECTION

Heading :

Technologies we work with .

Technology groups :

Frontend

Next.js

React

TypeScript

Tailwind CSS

Backend

21. HOMEPAGE FINAL CTA

Large focused section.

Headline :

Let's build what comes next.

Description :

Tell us about the product, system or challenge you are working on.

Primary :

Start a Project

Secondary :

Talk to Our Team

22. COMPANY PAGE

Route :

/company

Sections:

1. Hero
2. Company story
3. Mission
4. Vision
5. What we believe
6. How we work
7. Leadership
8. Company timeline
9. Technology philosophy
10. CTA

23. COMPANY VALUES

Suggested themes:

Build for Reality

Technology must solve an actual problem.

Deliver Responsibly

Quality, communication and accountability matter.

Keep Improving

Technology and organizations continuously evolve.

Think Beyond Code

Successful systems depend on people, operations and strategy.

24. SERVICES OVERVIEW

Route:

/services

Hero :

Technology capabilities from strategy to production .

Then :

- service cards
 - methodology
 - engagement model
 - selected work
 - CTA
-

25 . I N D I V I D U A L S E R V I C E T E M P L A T E

Each service detail page must contain :

1. Hero
 2. Service overview
 3. Problems we solve
 4. Capabilities
 5. Deliverables
 6. Our process
 7. Technologies
 8. Related projects
 9. FAQ s
 10. CTA
-

26 . S E R V I C E D A T A M O D E L

59. NAVIGATION CMS

Allow admin to manage:

- menu_label
 - URL
 - dropdown_parent
 - sort_order
 - target
 - visibility
-

60. ADMIN USERS

Roles:

Super Admin

Full access.

Admin

Content and website management.

Editor

Content creation and editing.

Future roles:

- HR
- Marketing
- Support

61. AUTHORIZATION

Backend permissions must be checked in Laravel.

Never rely only on hiding frontend controls.

Example permissions:

services.view

services.create

services.update

services.delete

projects.view

projects.create

projects.update

projects.delete

articles.publish

users.manage

settings.manage

62. CORE API STRUCTURE

Base:

/api/v1

Public:

GET /services

GET /services/{slug}

GET /products

GET /products/{slug}

GET /projects

GET /projects/{slug}

GET /industries

GET /articles

GET /articles/{slug}

GET /careers

GET /careers/{slug}

POST /enquiries

POST /career-applications

63. ADMIN API

Examples:

POST /admin/login

POST /admin/logout

GET /admin/user

GET /admin/dashboard

GET /admin/services

POST /admin/services

PUT /admin/services/{id}

DELETE /admin/services/{id}

```

```
PUT /admin/enquiries/{id}
```

```
GET /admin/settings
```

```
PUT /admin/settings
```

64. API RESPONSE FORMAT

Keep responses consistent.

Example:

```
{  
  
  "success": true,  
  
  "message": "Projects retrieved successfully.",  
  
  "data": []  
}
```

Validation:

```
{  
  
  "success": false,  
  
  "message": "Validation failed.",  
  
  "errors": {}  
}
```

65. FRONTEND APPLICATION STRUCTURE

Recommended:

```
src /
```

```
└-- app /
```

```
└-- components /
```

Very subtle transition.

75. MOTION TIMING

Preferred range:

150ms – 700ms

Microinteraction:

150 – 250ms

Section entrance:

400 – 700ms

Avoid long animations that delay interaction.

76. FRAMER MOTION

Use for:

- component entrance
 - stagger
 - mobile navigation
 - modal
 - accordion
 - interactive cards
 - CTA
 - route transitions
-

77. GSAP

Use only for:

- advanced homepage sequencing
- controlled scroll storytelling
- complex pinned sections

Do not depend heavily on GSAP for basic animation.

78. THREE.JS

Three.js is optional.

Recommended use:

One hero visual representing interconnected technology systems.

Must include:

- desktop enhancement
- simplified tablet rendering
- static or lightweight mobile fallback
- automatic disable for reduced-motion preference

Performance takes priority.

79. MOBILE EXPERIENCE

The mobile version must not be a compressed desktop page.

Requirements:

- dedicated menu
- vertically stacked content
- simplified animations
- large touch targets
- optimized images
- readable typography
- reduced 3D effects
- clear CTAs

80. RESPONSIVE BREAKPOINTS

Use Tailwind breakpoints consistently.

Test at minimum:

320px

375px

430px

768px

1024px

1280px

1440px

1920px

81. SEO

Every public page requires:

- page title
 - description
 - canonical URL
 - Open Graph image
 - Open Graph title
 - Open Graph description
 - robots directive
 - structured data where applicable
-

82. STRUCTURED DATA

Implement:

Organization

WebSite

WebPage

BreadcrumbList

Article

Service

JobPosting

83. TECHNICAL SEO

Required:

/sitemap.xml

/robots.txt

Also:

- semantic headings

- canonical URLs
 - proper 404
 - descriptive links
 - image alt text
 - clean slugs
 - internal linking
-

84. PERFORMANCE

Performance is a launch requirement.

Optimize:

- images
 - JavaScript
 - animations
 - fonts
 - API requests
 - CSS
 - caching
-

85. IMAGES

Use:

- AVIF where appropriate
- WebP
- responsive image sizes
- lazy loading below fold

Never upload huge raw images directly.

86. FONT PERFORMANCE

Prefer:

next/font

Use limited font weights.

Avoid loading unnecessary families.

87. API PERFORMANCE

Public APIs should:

- return only required fields
 - paginate large datasets
 - cache public content where appropriate
 - avoid N+1 database queries
 - use proper database indexing
-

88. DATABASE INDEXING

Index commonly queried fields:

slug

status

featured

published_at

created_at

category_id

service_id

project_id

Add unique constraints where appropriate.

89. SECURITY

Minimum requirements:

- HTTPS
 - Laravel CSRF protection where applicable
 - input validation
 - output escaping
 - SQL injection protection
 - XSS mitigation
 - authentication throttling
 - authorization
 - secure cookies
 - session expiration
 - secure headers
 - upload validation
 - environment isolation
 - no debug information in production
-

90. ENVIRONMENT VARIABLES

Never commit:

APP_KEY

DB_PASSWORD

SMTP_PASSWORD

AUTH_SECRET

API_SECRET

Production:

APP_ENV=production

APP_DEBUG = false

91. FILE UPLOAD SECURITY

Validate:

- M I M E t y p e
- e x t e n s i o n
- f i l e s i z e
- i m a g e d i m e n s i o n s w h e r e n e e d e d

Use generated filenames.

Never trust original uploaded filenames.

92. CONTACT FORM PROTECTION

Implement:

- C S R F
- r a t e l i m i t i n g
- v a l i d a t i o n
- b o t p r o t e c t i o n
- h i d d e n h o n e y p o t w h e r e u s e f u l

CAPTCHA only if spam becomes significant.

93. EMAIL SYSTEM

Required messages:

New Project Enquiry

Sent to company.

Enquiry Confirmation

Sent to visitor.

Career Application

Sent internally.

Career Confirmation

Sent to applicant.

Password Reset

Admin.

94. EMAIL TEMPLATE DESIGN

Use:

- company logo
- deep navy
- restrained gold accent
- clear body text
- CTA buttons
- contact footer

Emails must look consistent with website branding.

95. ANALYTICS

Set up:

- Google Analytics
- Google Search Console

Track:

project_enquiry_submit

contact_submit

service_cta_click

case_study_view

product_click

career_application

external_product_visit

96. ERROR STATES

Custom :

404

500

403

Form Error

Empty State

API Failure

Errors should not expose server internals.

97. LOADING STATES

Use skeletons for:

- projects
- articles
- services
- CMS tables

Forms should show:

- loading
 - success
 - error
-

98. ACCESSIBILITY

Target good WCAG 2.1 AA alignment.

Requirements:

- keyboard accessible
 - visible focus
 - descriptive labels
 - semantic structure
 - sufficient contrast
 - accessible modals
 - reduced-motion support
 - meaningful alt text
-

99. ADMIN CMS UI

CMS should be optimized for actual work.

Desktop-first but responsive.

Layout:

Side bar

Top bar

Main Content

Side bar collapses on smaller screens.

100. CMS TABLES

Tables need:

- search
- filtering
- pagination
- status badges

- bulk actions where appropriate
 - edit
 - archive
 - delete where authorized
-

101. CMS EDITOR

For articles and page content:

Use a structured rich-text editor.

Support:

- headings
- paragraph
- links
- lists
- images
- quotes
- code blocks if needed

Sanitize output.

102. AUDIT LOG

Recommended from launch if achievable.

Table:

audit_logs

Fields:

id

user_id

action

entity_type

entity_id

old_values

new_values

ip_address

created_at

Track important CMS changes.

103. DATABASE MIGRATIONS

Every database change must use Laravel migrations.

Do not manually create production tables without corresponding migrations.

104. SEEDERS

Use seeders for:

- roles
 - permissions
 - super admin
 - initial settings
 - optional initial service data
-

105. BACKUP STRATEGY

Before launch:

- MySQL backup
- Laravel files backup
- Next.js deployment backup
- environment configuration record

After launch :

Enable scheduled hosting backups where available.

106. DIRECT ADMIN DEPLOYMENT ARCHITECTURE

Recommended :

/home/ACCOUNT/

|

| -- domains/

| | -- sardaunatechlabs.com.ng/

| | | -- public_html/

| |

| | -- api.sardaunatechlabs.com.ng/

| | | -- public_html/

|

| -- laravel-api/

| -- app/

| -- bootstrap/

| -- config/

| -- database/

| -- routes/

| -- storage/

| -- vendor/

Laravel application source should remain outside its publicly exposed directory whenever hosting configuration permits.

107. NEXT.JS DEPLOYMENT DECISION

Before implementation reaches advanced Next.js server features, verify whether hosting supports persistent Node.js applications.

If yes:

Deploy full Next.js runtime.

If no:

Use static/static-first Next.js frontend.

Laravel remains responsible for all dynamic functionality.

108. STATIC-FIRST FALLBACK

Next.js can build the public site.

Dynamic calls such as:

contact

careers

CM S

projects

articles

can communicate with Laravel APIs.

This keeps the platform compatible with conventional DirectAdmin hosting.

109. SSL

Required:

<https://sardaunatechlabs.com.ng>

<https://www.sardaunatechlabs.com.ng>

<https://api.sardaunatechlabs.com.ng>

Redirect HTTP → HTTPS.

Choose one canonical host:

Prefer:

`https://sardauatechlabs.com.ng`

110. CORS

If using:

`api.sardauatechlabs.com.ng`

allow only required origins.

Production example:

`https://sardauatechlabs.com.ng`

Do not use:

*

for authenticated endpoints.

111. 48-HOUR IMPLEMENTATION ORDER

PHASE 1

Hours 0-3

Freeze:

- `sitemap`
- `technology stack`
- `design language`
- `database architecture`
- `API architecture`
- `homepage sections`

Create repositories.

Create environments.

112 . P H A S E 2

H o u r s 3 - 7

F r o n t e n d f o u n d a t i o n :

- T a i l w i n d t o k e n s
 - t y p o g r a p h y
 - c o l o r s
 - c o n t a i n e r
 - b u t t o n s
 - s e c t i o n s
 - c a r d s
 - n a v i g a t i o n
 - m o b i l e n a v i g a t i o n
 - f o o t e r
 - m o t i o n u t i l i t i e s
-

113 . P H A S E 3

H o u r s 7 - 13

H o m e p a g e :

- h e r o
- i n t r o d u c t i o n
- s e r v i c e s
- p r o d u c t s
- s e l e c t e d w o r k
- i n d u s t r i e s
- p r o c e s s
- t e c h n o l o g i e s

- trust
- insights
- final CTA

Complete responsive behaviour.

114. PHASE 4

Hours 13 – 19

Public pages:

- Company
 - Services
 - Service template
 - Solutions
 - Solution template
 - Work
 - Case study
-

115. PHASE 5

Hours 19 – 24

Remaining public pages:

- Industries
- Insights
- Article
- Careers
- Job page
- Contact
- Privacy

- Terms

- 404
-

116. PHASE 6

Hours 24 – 30

Laravel backend:

- project setup
 - MySQL
 - migrations
 - models
 - service layer
 - public APIs
 - validation
 - file storage
 - mail
-

117. PHASE 7

Hours 30 – 35

Admin:

- authentication
- dashboard
- services
- products
- projects
- articles
- careers

- en q u i r i e s
- se t t i n g s

118 . P H A S E 8

H o u r s 35 – 39

I n t e g r a t i o n :

C o n n e c t N e x t . j s t o L a r a v e l .

T e s t :

- d a t a l o a d i n g
- c o n t e n t e d i t i n g
- e n q u i r i e s
- c a r e e r a p p l i c a t i o n s
- m e d i a
- e m a i l

119 . P H A S E 9

H o u r s 39 – 43

C o n t e n t :

- c o m p a n y i n f o r m a t i o n
- s e r v i c e s
- E v e n t P a s s
- T r a d e r E R P
- c a s e s t u d i e s
- t e a m
- c o n t a c t d e t a i l s
- l e g a l i n f o r m a t i o n

- real screenshots

Remove every placeholder.

120 . PH A S E 10

Hours 43 – 46

Optimization :

- image compression
 - lazy loading
 - caching
 - SEO
 - Open Graph
 - structured data
 - accessibility
 - animation tuning
 - API optimization
 - database indexes
-

121 . PH A S E 11

Hours 46 – 48

Production :

- domain
- SSL
- database
- environment variables
- email
- API

- frontend
- CMS
- analytics
- Search Console
- backups

Run final production QA.

12.2. PO FEATURES

Nothing ships without:

- Homepage
- Company
- Services
- Solutions
- Work
- Contact
- responsive UI
- Laravel API
- MySQL
- CMS authentication
- services CMS
- projects CMS
- product CMS
- enquiries
- SEO
- SSL
- production email

123 . P1 FEATURES

Strongly preferred before launch :

- Insights
 - Careers
 - Industries
 - Team
 - Testimonials
 - analytics
 - audit logs
-

124 . P2 FEATURES

Can follow immediately after launch :

- advanced CMS publishing workflow
 - article revisions
 - media folders
 - CRM functionality
 - lead assignment
 - newsletter
 - customer portal
 - multilingual content
 - partner portal
 - advanced search
 - client login
 - support portal
-

125. HOMEPAGE ACCEPTANCE TEST

Homepage is complete when :

- hero works
 - CTA works
 - navigation works
 - animation is smooth
 - mobile layout works
 - services visible
 - products visible
 - projects visible
 - content is real
 - footer works
 - no horizontal overflow
 - images optimized
 - page metadata configured
-

126. PUBLIC WEBSITE ACCEPTANCE TEST

Before launch :

- every route loads
- every internal link works
- forms submit
- no placeholder images
- no lorem ipsum
- no console errors
- no uncaught API errors
- no broken images

- mobile navigation works
 - page titles correct
 - social preview works
-

127. CMS ACCEPTANCE TEST

Admin must be able to:

- log in
- log out
- edit services
- create projects
- edit products
- publish articles
- create career openings
- view enquiries
- upload images
- edit site settings

Role restrictions must work.

128. SECURITY ACCEPTANCE TEST

Verify:

- production debug disabled
- .env inaccessible
- unauthorized admin access blocked
- invalid uploads rejected
- SQL input handled safely
- form validation server-side

- H T T P S e n f o r c e d
 - a u t h e n t i c a t i o n c o o k i e s s e c u r e d
 - C O R S r e s t r i c t e d
 - s e n s i t i v e A P I e n d p o i n t s p r o t e c t e d
-

129 . P E R F O R M A N C E A C C E P T A N C E T E S T

T a r g e t s t r o n g r e a l - w o r l d e x p e r i e n c e .

C h e c k :

- i n i t i a l l o a d
- L a r g e s t C o n t e n t f u l P a i n t
- l a y o u t s h i f t
- i n t e r a c t i o n l a t e n c y
- i m a g e s i z e s
- J a v a S c r i p t b u n d l e s
- m o b i l e p e r f o r m a n c e

D o n o t s a c r i f i c e a c t u a l u s a b i l i t y t o c h a s e a p e r f e c t s y n t h e t i c s c o r e .

130 . C O N T E N T R U L E S

N e v e r p u b l i s h :

- f a k e c l i e n t s
- f a k e t e s t i m o n i a l s
- f a k e s t a t i s t i c s
- f a k e p r o j e c t s
- m e a n i n g l e s s t e c h n o l o g y b u z z w o r d s

U s e r e a l w o r k a s t h e s t r o n g e s t c r e d i b i l i t y s i g n a l .

131. DESIGN RULES

Avoid:

- excessive gradient backgrounds
- glowing everything
- overly rounded cards everywhere
- generic floating shapes
- oversized animation
- meaningless 3D scenes
- stock “developers around laptop” imagery

Preferred:

- strong typography
 - controlled contrast
 - excellent spacing
 - authentic screenshots
 - thoughtful motion
 - product-focused visuals
-

132. FINAL HOME EXPERIENCE

The visitor journey should be:

Who is STL?

What does STL build?

What services does STL offer?

What has STL actually built?

How does STL work?

Can I trust STL?

How do I start a project?

135. DEFINITION OF SUCCESS

The finished Sardauna Tech Lab website should not make visitors think:

They build websites.

It should make them think:

They understand technology, product development, engineering and digital systems, and they can deliver serious technology projects.

That is the standard every design, content and engineering decision should support.
